MANAGED SERVICES

MY-SCHOOL

MY-SCHOOL is an online learning portal which allows you to access your school's on-line systems and applications 24 x 7 from any device which can access the internet.

MY-SCHOOL is a cloud based application offering predictable, on demand pay per user licensing costs which schools can easily deploy so you don't need to invest in any IT infrastructure. Applications and files are hosted in a secure datacentre outside of the school.

Single Sign On
Reduce time and cost of password management with single sign on access to key applications

Widgets
Select from a variety of widgets including mail, calendar, RSS news feeds, weather, maps, clock and search

Notice Board Alerts
Keep students and staff up to date with school announcements and news

Virtualised Desktop Link
From your MY-SCHOOL portal link to your virtual desktop to access school resources and applications without having to login and out

Customisation
Personalise your portal to best suit your needs by adding school logos, customising your portal colours and adding widgets

Internet Favourites Widget
Personalise your portal with up to 10 website shortcuts

Emergency Alert
By clicking on a button, teachers can alert a distribution group for help if a situation arises in the classroom

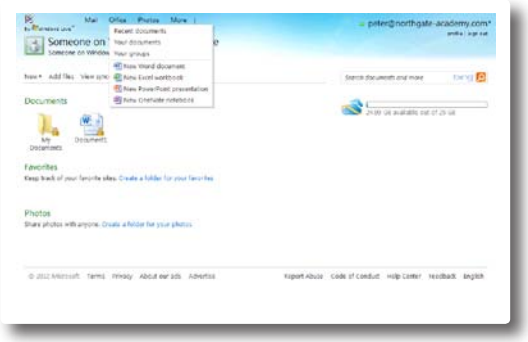
Key Functionality



Applications & Files

Single Sign on to your VLE & Applications

MY-SCHOOL provides single sign on access to any VLE, providing you with the flexibility of choice and the ability to integrate with your school's current VLE.

MY-SCHOOL also provides single sign on access to VLE and applications such as email, calendar, tasks, shared storage, office applications and a number of 3rd party applications such as cashless catering, library systems and game based learning service.

Microsoft Applications & Files

MY-SCHOOL integrates with Microsoft's email application, Live@Edu providing you with easy access to your email, calendar, tasks and storage. It also provides access to familiar, hosted Microsoft Office applications such as Word, PowerPoint and Excel.

> "Finally we have something which will help us realise our objective to move away from locally stored device dependent software driven ICT to open access online. This improves access to key applications at home through removing the need to buy Office licenses. All of our students regardless of background and financial circumstances can have access to the same levels of technology at home."

Jon Barker, Executive Principal, Hugh Christie Technology College

Benefits of MY-SCHOOL

MY-SCHOOL

Ease of use

- Single Sign On functionality means you only need one set of login details to access all your school's online systems and applications.
- The portal integrates with familiar web applications and your existing applications such as Microsoft Office.
- As a cloud based application, MY-SCHOOL is easy to deploy with no need to invest in hardware or any specific IT infrastructure.

Value for Money

- No need to invest in specific applications as MY-SCHOOL integrates with your existing on-line applications
- Integration with Microsoft's free Live@Edu application providing email, calendar, storage & instant messaging
- Predictable, subscription based pay per user licensing costs
- Reduced management and support costs

Reducing the Digital Divide

- As an online portal, MY-SCHOOL can be accessed anywhere and from any device with an internet connection, providing flexible and instant access to all your applications whether at home or school.
- Access to the most up to date versions of Microsoft applications online
- Improved communication and collaboration between students and staff with access to shared storage for group projects and instant messaging.
